

## Office of the Secretary, DOT

## Sec. 1-2

and other passengers and cargo carried for token service charges, are not considered as revenue traffic.

*Transportation, free.* The carriage of any person or cargo (other than cargo owned by the air carrier) without compensation.

*Unit basis (in depreciation accounting).* A plan under which depreciation expenses is accrued upon the basis of the book cost of the individual item of property in relation to the service life and salvage value of the particular item.

*Value, service.* The difference between the book cost and the residual value of property and equipment.

*Weight, allowable gross.* The maximum gross weight (of the aircraft and its contents) which an aircraft is licensed to carry into the air on each flight stage.

*Weight, average available.* The average capacity available for revenue traffic, determined by dividing available ton-miles by aircraft miles in revenue service.

*Weight, empty.* The weight of the airframe, engines, propellers, and fixed equipment of an aircraft. Empty weight excludes the weight of the crew and payload, but includes the weight of all fixed ballast, unusable fuel supply, undrainable oil, total quantity of engine coolant, and total quantity of hydraulic fluid.

*Weight, passenger.* For the purposes of this part, a standard weight of 200 pounds per passenger (including all baggage) is used for all civil operations and classes of service. Other weights may be prescribed in specific instances upon the initiative of the Department of Transportation or upon a factually supported request by an air carrier.

*Wet-Lease Agreement* means an agreement under which one carrier leases an aircraft with flight crew to another air carrier.

[ER-755, 37 FR 19726, Sept. 21, 1972, as amended by Amdt. 241-58, 54 FR 5590, Feb. 89, 1989]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting Section 03, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at [www.fdsys.gov](http://www.fdsys.gov).

### Section 04 Air Carrier Groupings

(a) All large certificated air carriers are placed into three basic air carrier groupings based upon their level of operations and the nature of these operations. In order to determine the level of operations, total operating revenues for a twelve-month period are used. The following operating revenue ranges are used to establish air carrier groupings:

| Carrier Group | Total Annual Operating Revenues |
|---------------|---------------------------------|
| I .....       | 0-\$100,000,000                 |
| II .....      | \$100,000,001-\$1,000,000,000   |
| III .....     | \$1,000,000,001+                |

For reporting purposes, Group I air carriers are further divided into two subgroups: (1) Air carriers with total annual operating revenues from \$20,000,000 to \$100,000,000 and (2) Air carriers with total annual operating revenues below \$20,000,000.

(b) Both the criteria for establishing air carrier groupings and the assignment of each air carrier to a specific group of carriers will be reviewed periodically by the Director, Office of Airline Information, to assure the maintenance of appropriate standards for the grouping of carriers. When an air carrier's level of operations passes the upper or lower limit of its currently assigned carrier grouping, the carrier is not automatically transferred to a different group and a new level of reporting. The Office of Airline Statistics will issue an updated listing of the carrier groups on an annual basis. A carrier may petition for reconsideration of its assigned carrier grouping or request a waiver from the accounting and reporting requirements that are applicable to a particular group under the provisions of section 1-2 of this Uniform System of Accounts and Reports.

[Amdt. 241-60, 56 FR 12658, Mar. 27, 1991, as amended at 60 FR 66723, Dec. 26, 1995]

### GENERAL ACCOUNTING PROVISIONS

#### Section 1 Introduction to System of Accounts and Reports

##### Sec. 1-1 Applicability of system of accounts and reports.

Each large certificated air carrier shall keep its books of account, records and memoranda and make reports to the BTS in accordance with this system of accounts and reports. The BTS reserves the right, however, under the provisions of sections 49 U.S.C. 41701 and 41708, to expand or otherwise modify the classes of carriers subject to this system of accounts and reports.

[ER-1400, 50 FR 11, Jan. 2, 1985, as amended at 60 FR 66723, Dec. 26, 1995]

##### Sec. 1-2 Waivers from this system of accounts and reports.

A waiver from any provision of this system of accounts or reports may be made by the BTS upon its own initiative or upon the submission of written request therefor from any air carrier, or group of air carriers, provided that such a waiver is in the public interest and each request for waiver expressly demonstrates that: existing peculiarities or unusual circumstances warrant

## Sec. 1-3

a departure from a prescribed procedure or technique; a specifically defined alternative procedure or technique will result in a substantially equivalent or more accurate portrayal of operating results or financial condition, consistent with the principles embodied in the provisions of this system of accounts and reports; and the application of such alternative procedure will maintain or improve uniformity in substantive results as between air carriers.

[ER-755, 37 FR 19726, Sept. 21, 1972, as amended at 60 FR 66723, Dec. 26, 1995]

### Sec. 1-3 General description of system of accounts and reports.

(a) This system of accounts and reports is designed to permit limited contraction or expansion to reflect the varying needs and capacities of different air carriers without impairing basic accounting comparability as between air carriers. In its administration three air carrier groups, designated Group I, Group II, and Group III, respectively (see section 04), are established by the BTS. This grouping will be reviewed from time to time upon petition of individual air carriers or by initiative of the BTS with the view of a possible regrouping of the air carriers.

(b) Under the system of accounts prescribed, balance sheet elements are accounted for by all air carrier groups within a fixed uniform pattern of specific accounts. All profit and loss elements are accounted for within specific objective accounts established for each air carrier group resulting from dual classifications, designated for each air carrier group, which are descriptive of both basic areas of financial activity, or functional operation, and objective served. The profit and loss elements of the three air carrier groups can be reduced to broad objectives and general or functional classifications which are comparable for all air carrier groups. Both balance sheet and profit and loss accounts and account groupings are designed, in general, to embrace all activities, both air transport and other than air transport, in which the air carrier engages and provide for the separation of elements identifiable exclusively with other than air transport ac-

tivities. Profit and loss elements which are recorded during the current accounting year are subclassified as between (1) those which relate to the current accounting year and adjustments of a recurrent nature applicable to prior accounting years, and (2) extraordinary items of material magnitude.

(c) In order to afford air carriers as much flexibility and freedom as possible in establishing ledger and subsidiary accounts to meet their individual needs, a minimum number of account subdivisions have been prescribed in this Uniform System of Accounts. It is intended, however, that each air carrier, in maintaining its accounting records, will provide sub-account and subsidiary account segregations of accounting elements which differ in nature of accounting characteristics, in a manner which will render individual elements readily discernible and traceable throughout the accounting system, and will provide for relating profit and loss elements to applicable balance sheet counterparts.

[ER-755, 37 FR 19726, Sept. 21, 1972, as amended at 60 FR 66723, Dec. 26, 1995]

### Sec. 1-4 System of accounts coding.

(a) A four digit control number is assigned for each balance sheet and profit and loss account. Each balance sheet account is numbered sequentially, within blocks, designating basic balance sheet classifications. The first two digits of the four digit code assigned to each profit and loss account denote a detailed area of financial activity or functional operation. The first two digits, thus assigned to each profit and loss account, are numbered sequentially within blocks, designating more general classifications of financial activity and functional operation. The second two digits assigned to profit and loss accounts denote objective classifications.

(b) A fifth digit, appended as a decimal, has been assigned for internal control by the BTS of prescribed subdivisions of the primary objective balance sheet and profit and loss classifications. A different fifth digit code number from that assigned by the BTS may be adopted for internal record-keeping by the air carrier provided the
